Economic Growth Through Sustainability: The Role of Plastic Recycling

The plastic recycling industry is committed to minimizing plastic waste, developing new economic opportunities, promoting economic growth by creating new markets for recycled products, and facilitating the transition to a more sustainable circular economy. The circular economy is also a key component in achieving the Sustainable Development Goals (SDGs) by 2030.

The implementation of a circular economy in Indonesia has the potential to increase Gross Domestic Product (GDP) by IDR 593-638 trillion by 2030. The circular economy in Indonesia can reduce CO2e emissions by 126 million tons, decrease water usage by 6.3 billion cubic meters, and reduce waste by up to 50 percent by 2030.
